

30 years **streetz**
ahead!

CHAT

SATURDAY 18th APRIL 2026

**Written and directed by
William Jones and Elizabeth Lahav**

Produced by Taylor Agarrat

Follow

Elizabeth Lahav
CEO/ FOUNDER
Streetz Ahead

Just a quick note to say.....

As founder of Streetz Ahead in 1995, I am proud to work alongside my very talented team who have worked relentlessly to write, inspire, lead and direct the Streetz Ahead children to produce something amazing! I hope you all enjoy the show.

Taylor Agarrat

Producer

I'm Taylor, an artist with a deep passion for dance and performance. Over the years, I've had the joy of touring with LIFT, appearing on the BBC, and performing in pantomimes and showcases. I've been a part of the family for the last eight years, and I'm proud for Chat SOS to be the last show I'll be producing at Streetz Ahead!

Elizabeth Lahav

Creative Director

I'm Elizabeth, Founder and CEO of Streetz Ahead. I lead programmes that blend dance, mentoring, and creative therapy to help young people build confidence and resilience. This year I'm very excited and proud to be directing Chat SOS!

William Jones

Assistant Creative Director & Playwright

I'm William, a North London-based artist with a First Class BA in Inclusive Performance from Chickenshed Theatre. I've delivered issue-based workshops in schools and performed with Tales From the Shed, using play to connect with young audiences. Directing my first Streetz Ahead production has been a joy — the talent and energy of these young people has truly inspired me. Bringing theatre into the community is what I love, and I'm proud to be part of this journey.

ALL ABOUT CHAT GPT

Chat GPT is a form of generative AI that uses the internet to produce responses to questions and commands a user may input.

GPT Stands for: Generative Pre-Trained Transformer

Variety - Chat gpt can be used in a wide range of contexts for varying purposes (e.g. writing notes for school, creating a schedule for work)

Speed - Chat gpt can generate responses within seconds!

Problems with accuracy - It can deliver outdated or biased information.

Lack of emotional intelligence - AI can miss subtle details in communication that a human would pick up on (e.g. facial expressions, tone).

Water - Water is used to cool the large amount of heat produced by data centres. A recent report from the United Kingdom's Government Digital Sustainability Alliance predicts that AI will increase global water usage from 1.1 billion cubic metres to 6.6 billion cubic metres by 2027.

How to keep safe when using generative AI

Parental controls - ChatGPT's terms of use state that children under 13 years old should not use the chatbot. Children aged 13-18 must get a parent's permission before using the software.

Avoid sharing **personal information** with AI

Encourage kids to **double-check AI-generated answers** with trusted sources, as the AI can be wrong.

THANK YOU

WE HOPE YOU ENJOYED THE VIBES.

A huge thank you to Big Yellow Storage for their incredible support over the years! They've generously provided us with the space to store decades' worth of costumes and props — we truly have an archive that spans 30 years of shows and memories. We're so grateful to have a home for our creative history!
